Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 65

Acanthopanax giraldii harms, antitumor activity, macrophage activation, C3 cleavage, 74
Adhesion, metastasis, RGD peptides, platelet aggregation, 259
Aflatoxin B_1, geniposide, unscheduled DNA synthesis glutathione *S*-transferase, glutathione peroxidase, 133
Aminolevulinic acid, photosensitization, endogenous porphyrin, K562 leukemia, 127
Ammonia, *Helicobacter pylori*, gastric cancer, atrophic gastritis 15
Anti-metastasis, (−)-epigallocatechin gallate, green tea, B16 melanoma, 51
Anti-tumour necrosis factor-alpha antibodies, cachexia, tumour necrosis factor-alpha, interleukin-6, 239
Anticarcinogen, testis, steroids, 123
Antitumor activity, *Acanthopanax giraldii* harms, macrophage activation, C3 cleavage, 74
Antitumor promoters, Epstein-Barr virus, dihydroagarofuran sesquiterpenes, structural requirement, 19
Aqueous extract, pan masala, chromosome aberration, sister chromatid exchange, micronucleus, 221
Atrophic gastritis *Helicobacter pylori*, ammonia, gastric cancer, 15 B16 melanoma, (−)-epigallocatechin gallate, green tea, anti-metastasis, 51

Benzo[*b*]fluoranthene, metabolic activation, DNA adducts, skin, 159
Blood, breast cancer, electrophoresis, fucosyltransferase, haptoglobins, ovarian cancer, 115
Breast cancer, blood, electrophoresis, fucosyltransferase, haptoglobins, ovarian cancer, 115

C3 cleavage, *Acanthopanax giraldii* harms, antitumor activity, macrophage activation, 74
C-erbB-2/neu(HER-2), oncogenes, oral carcinoma, immunohistochemisty, 215
Cachexia, tumour necrosis factor-alpha, interleukin-6, anti-tumour necrosis factor-alpha antibodies, 239
Canthaxanthin, inhibition, tumor growth, transformed and non-transformed cells, 209
Carcinogenic nitrosamines, sulphur compounds, nitrosation, inhibition, 227
Cell proliferation, dimethylhydrazine, colon tumorigenesis, iron concentration, malonaldehyde, oxidative stress, 245
Cholesterol, human gliomas, human meningioma, lipid, phosphoglyceride, 169
Chromosome aberration, pan masala, sister chromatid exchange, micronucleus, aqueous extract, 221
Cisplatin, Harvey-ras gene, DNA transfection, polymerase chain reaction, DNA sequencing, 27
Colloidal gold, mouse mammary tumor virus, long terminal repeat, open reading frame, monoclonal antibody, 201
Colon tumorigenesis, dimethylhydrazine, iron concentration, malonaldehyde, cell proliferation, oxidative stress, 24
Colorectal carcinoma, IMV, sero-epidemiology, 233
Cysteine, gluthathione, methotrexate uptake, thymocytes, thymic lymphosarcoma cells, 251

Dietary nitrate, piperazine, endogenous formation of *N*-nitrosomonopiperazine and *N,N'* dinitrosopiperazine* 139
Dihydroagarofuran sesquiterpenes, Epstein-Barr virus, antitumor promoters, structural requirement, 19
Dimethylhydrazine, colon tumorigenesis, iron concentration, malonaldehyde, cell proliferation, oxidative stress, 245
Dintropyrene, nitrosopyrene, nitroreduction, 73
Diode lasers, photodynamic therapy, tumours, naphthalocyanines, pharmacokinetics, 145
DNA adducts, benzo[*b*]fluoranthene, metabolic activation, skin, 159
DNA adducts, polycyclic aromatic hydrocarbons, ^{32}P-postlabeling assay, 35
DNA sequencing, Harvey-ras gene, cisplatin, DNA transfection, polymerase chain reaction, 27
DNA synthesis, RNA synthesis, selenium, sulfhydryl coumpounds, 43
DNA transfection, Harvey-ras gene, cisplatin, polymerase chain reaction, DNA sequencing, 27

Electrophoresis, blood, breast cancer, fucosyltransferase, haptoglobins, ovarian cancer, 115

Endocrine, testosterone, psychosocial stressor, mammary tumor, 85
Endogenous formation of *N*-nitrosomonopiperazine and *N,N'*dinitrosopiperazine* piperazine, dietary nitrate, 139
Endogenous porphyrin, photosensitization, aminolevulinic acid, K562 leukemia, 127
Environmental tobacco smoke, vinylpyridines, tumorigenicity, mutagenicity, 107
Epidermal growth factor, epidermal growth factor overexpression, transforming growth factor α, larynx carcinoma, 189
Epidermal growth factor overexpression, epidermal growth factor, transforming growth factor α, larynx carcinoma, 189
(−)-Epigallocatechin gallate, green tea, anti-metastasis, B16 melanoma, 51
EPR, tumor necrosis factor, tumor cells, spin label, membrane fluidity, 183
Epstein-Barr virus, dihydroagarofuran sesquiterpenes, antitumor promoters, structural requirement, 19

Fibrosarcoma, phytic acid, inositol hexaphosphate, 9
Fucosyltransferase, blood, breast cancer, electrophoresis, haptoglobins, ovarian cancer, 115

Gastric cancer, *Helicobacter pylori*, ammonia, atrophic gastritis 15
Geniposide, aflatoxin B_1, unscheduled DNA synthesis glutathione *S*-transferase, glutathione peroxidase, 133
Glioblastoma, glioma, normal glial cells, proto-oncogenes, growth factors, transcription rates, 55
Glioma, glioblastoma, normal glial cells, proto-oncogenes, growth factors, transcription rates, 55
Glutathione peroxidase, geniposide, aflatoxin B_1, unscheduled DNA synthesis glutathione *S*-transferase, 133
Gluthathione, cysteine, methotrexate uptake, thymocytes, thymic lymphosarcoma cells, 251
Green tea, (−)-epigallocatechin gallate, anti-metastasis, B16 melanoma, 51
Growth factors, glioblastoma, glioma, normal glial cells, proto-oncogenes, transcription rates, 55

Haptoglobins, blood, breast cancer, electrophoresis, fucosyltransferase, ovarian cancer, 115
Harvey-ras gene, cisplatin, DNA transfection, polymerase chain reaction, DNA sequencing, 27
Helicobacter pylori, ammonia, gastric cancer, atrophic gastritis 15
Human gliomas, human meningioma, lipid, cholesterol, phosphoglyceride, 169
Human meningioma, human gliomas, lipid, cholesterol, phosphoglyceride, 169

Immunohistochemisty, oncogenes, C-erbB-2/neu (HER-2), oral carcinoma, 215
IMV, sero-epidemiology, colorectal carcinoma, 233
Inhibition, canthaxanthin, tumor growth, transformed and non-transformed cells, 209
Inhibition, sulphur compounds, nitrosation, carcinogenic nitrosamines, 227
Inositol hexaphosphate, phytic acid, fibrosarcoma, 9
Interleukin-2, *MYC*, renal cell carcinoma, 173
Interleukin-6, cachexia, tumour necrosis factor-alpha, anti-tumour necrosis factor-alpha antibodies, 239
Iron concentration, dimethylhydrazine, colon tumorigenesis, malonaldehyde, cell proliferation, oxidative stress, 245

K562 leukemia, photosensitization, aminolevulinic acid, endogenous porphyrin, 127
K562 leukemia cells, major histocompatibility complex antigen, verapamil, recombinant human interferon-γ, 99

Larynx carcinoma, epidermal growth factor, epidermal growth factor overexpression, transforming growth factor α, 189
Lipid, human gliomas, human meningioma, cholesterol, phosphoglyceride, 169
Long terminal repeat, mouse mammary tumor virus, open reading frame, colloidal gold, monoclonal antibody, 201

Macrophage activation, *Acanthopanax giraldii* harms, antitumor activity, C3 cleavage, 74
Magnetic fields, tumor-promotion, mice, skin, 1
Major histocompatibility complex antigen, K562 leukemia cells, verapamil, recombinant human interferon-γ, 99
Malonaldehyde, dimethylhydrazine, colon tumorigenesis, iron concentration, cell proliferation, oxidative stress, 245
Mammary tumor, endocrine, testosterone, psychosocial stressor, 85 Membrane fluidity, tumor necrosis factor, tumor cells, spin label, EPR, 183
Metabolic activation, benzo[*b*]fluoranthene, DNA adducts, skin, 159
Metastasis, RGD peptides, adhesion, platelet aggregation, 259

Methotrexate uptake, gluthathione, cysteine, thymocytes, thymic lymphosarcoma cells, 251
Mice, tumor-promotion, magnetic fields, skin, 1
Micronucleus, pan masala, chromosome aberration, sister chromatid exchange, aqueous extract, 221
Monoclonal antibody, mouse mammary tumor virus, long terminal repeat, open reading frame, colloidal gold, 201
Mouse mammary tumor virus, long terminal repeat, open reading frame, colloidal gold, monoclonal antibody, 201
Mutagenicity, vinylpyridines, environmental tobacco smoke, tumorigenicity, 107
MYC, interleukin-2, renal cell carcinoma, 173

Naphthalocyanines, photodynamic therapy, tumours, diode lasers, pharmacokinetics, 145
Nitroreduction, dintropyrene, nitrosopyrene, 73
Nitrosation, sulphur compounds, carcinogenic nitrosamines, inhibition, 227
Nitrosopyrene, dintropyrene, nitroreduction, 73
Normal glial cells, glioblastoma, glioma, proto-oncogenes, growth factors, transcription rates, 55

Oncogenes, C-erbB-2/neu(HER-2), oral carcinoma, immunohistochemisty, 215
Open reading frame, mouse mammary tumor virus, long terminal repeat, colloidal gold, monoclonal antibody, 201
Oral carcinoma, oncogenes, C-erbB-2/neu(HER-2), immunohistochemisty, 215
Ovarian cancer, blood, breast cancer, electrophoresis, fucosyltransferase, haptoglobins, 115
Oxidative stress, dimethylhydrazine, colon tumorigenesis, iron concentration, malonaldehyde, cell proliferation, 245

P53, tumor suppressor gene, salivary gland pleomorphic adenoma, type I collagen-gel, 61
Pan masala, chromosome aberration, sister chromatid exchange, micronucleus, aqueous extract, 221
Pharmacokinetics, photodynamic therapy, tumours, naphthalocyanines, diode lasers, 145
Phosphoglyceride, human gliomas, human meningioma, lipid, cholesterol, 169
Photodynamic therapy, tumours, naphthalocyanines, diode lasers, pharmacokinetics, 145
Photosensitization, aminolevulinic acid, endogenous porphyrin, K562 leukemia, 127
Phytic acid, inositol hexaphosphate, fibrosarcoma, 9
Piperazine, endogenous formation of *N*-nitrosomonopiperazine and *N,N'* dinitrosopiperazine • dietary nitrate, 139
Platelet aggregation, metastasis, RGD peptides, adhesion, 259
^{32}P-postlabeling assay, polycyclic aromatic hydrocarbons, DNA adducts, 35
Polycyclic aromatic hydrocarbons, DNA adducts, ^{32}P-postlabeling assay, 35
Polymerase chain reaction, Harvey-ras gene, cisplatin, DNA transfection, DNA sequencing, 27
Promotion, skin carcinogenesis, rat, tumour histology, 151
Proto-oncogenes, glioblastoma, glioma, normal glial cells, growth factors, transcription rates, 55
Psychosocial stressor, endocrine, testosterone, mammary tumor, 85

Rat, skin carcinogenesis, tumour histology, promotion, 151
Recombinant human interferon-γ, K562 leukemia cells, major histocompatibility complex antigen, verapamil, 99
Renal cell carcinoma, interleukin-2, *MYC*, 173
RGD peptides, metastasis, adhesion, platelet aggregation, 259
RNA synthesis, DNA synthesis, selenium, sulfhydryl coumpounds, 43

Salivary gland pleomorphic adenoma, p53, tumor suppressor gene, type I collagen-gel, 61
Selenium, DNA synthesis, RNA synthesis, sulfhydryl coumpounds, 43
Sero-epidemiology, IMV, colorectal carcinoma, 233
Sister chromatid exchange, pan masala, chromosome aberration, micronucleus, aqueous extract, 221
Skin, benzo[*b*]fluoranthene, metabolic activation, DNA adducts, 159
Skin, tumor-promotion, magnetic fields, mice, 1
Skin carcinogenesis, rat, tumour histology, promotion, 151
Spin label, tumor necrosis factor, tumor cells, EPR, membrane fluidity, 183
Steroids, testis, anticarcinogen, 123
Structural requirement, Epstein-Barr virus, dihydroagarofuran sesquiterpenes, antitumor promoters, 19
Sulfhydryl coumpounds, DNA synthesis, RNA synthesis, selenium, 43
Sulphur compounds, nitrosation, carcinogenic nitrosamines, inhibition, 227

Testis, anticarcinogen, steroids, 123

Testosterone, endocrine, psychosocial stressor, mammary tumor, 85
Thymic lymphosarcoma cells, gluthathione, cysteine, methotrexate uptake, thymocytes, 251
Thymocytes, gluthathione, cysteine, methotrexate uptake, thymic lymphosarcoma cells, 251
Transcription rates, glioblastoma, glioma, normal glial cells, proto-oncogenes, growth factors, 55
Transformed and non-transformed cells, canthaxanthin, inhibition, tumor growth, 209
Transforming growth factor α, epidermal growth factor, epidermal growth factor overexpression, larynx carcinoma, 189
Tumor cells, tumor necrosis factor, spin label, EPR, membrane fluidity, 183
Tumor growth, canthaxanthin, inhibition, transformed and non-transformed cells, 209
Tumor necrosis factor, tumor cells, spin label, EPR, membrane fluidity, 183
Tumor suppressor gene, p53, salivary gland pleomorphic adenoma, type I collagen-gel, 61
Tumor-promotion, magnetic fields, mice, skin, 1
Tumorigenicity, vinylpyridines, environmental tobacco smoke, mutagenicity, 107
Tumour histology, skin carcinogenesis, rat, promotion, 151
Tumour necrosis factor-alpha, cachexia, interleukin-6, anti-tumour necrosis factor-alpha antibodies, 239
Tumours, photodynamic therapy, naphthalocyanines, diode lasers, pharmacokinetics, 145
Type I collagen-gel, p53, tumor suppressor gene, salivary gland pleomorphic adenoma, 61

Unscheduled DNA synthesis glutathione *S*-transferase, geniposide, aflatoxin B_1, glutathione peroxidase, 133

Verapamil, K562 leukemia cells, major histocompatibility complex antigen, recombinant human interferon-γ, 99
Vinylpyridines, environmental tobacco smoke, tumorigenicity, mutagenicity, 107

Cancer Letters, 65 (1992) 269–270
Elsevier Scientific Publishers Ireland Ltd.
